OBJECTIVE

Driven 4th-year Computer Engineering student seeking an internship to apply and deepen expertise in embedded systems, web, and mobile development. Passionate about crafting innovative, user-centric solutions and leveraging strong problem-solving skills to deliver impactful software applications.

SKILLS

Web Development: Experienced in building web apps using HTML, CSS, React, Node.js, and ASP.NET.

Mobile Development: Skilled in developing Android apps with Jetpack Compose, focusing on UI design and performance.

Embedded Systems: Proficiency in embedded programming, circuit design, microcontrollers, IoT solutions.

Programming Languages: Python, C#, JavaScript, SQL

Databases: MySQL, MSSQL, MongoDB, Firebase

Other: Agile development, problem-solving, debugging, and software testing.

PROJECT EXPERIENCE

ACART – Angeles Jeepney App System (In Development) | [Github](#) **DEC. 2024 - PRESENT**

- Currently developing an Android application to assist commuters in identifying jeepney routes efficiently.
- Utilizing Firebase for real-time route data storage and retrieval.
- Designing an intuitive user interface for route planning and fare computation.

LabWatch – Laboratory Safety Monitoring System (In Development) **DEC. 2024**

- Developing a safety system for labs using sensors (temperature, gas, smoke, etc.) to detect hazards in real time.
- Designing an Android app for instant alerts, hazard management, and safety guidance.
- Utilizing Firebase for real-time data storage and analysis.
- Aiming to improve lab safety through proactive monitoring and user notifications.

CashFlow App – Finance Tracker Android Mobile Application | [Github](#) **OCT. 2024**

- Developed an Android wallet application using Jetpack Compose for a modern and intuitive UI.
- Leveraged Firebase for secure data storage and real-time transaction tracking.
- Designed features such as expense tracking, budgeting, and visual analytics.
- Focused on providing users with an efficient tool for managing personal finances.

RentaRide System – Vehicle Rental Platform | [Github](#) **JUN. 2024**

- Developed a web-based system enabling seamless vehicle rentals with real-time tracking and integrated payment options.
- Built the backend using ASP.NET Core, with a Bootstrap-based frontend for responsive design.
- Used MSSQL for database management to store user and vehicle data securely.

Twitter Clone – Social Media Application | [Github](#) **OCT. 2023**

- Developed a full-stack Twitter clone using the MERN stack (MongoDB, Express, React, Node.js).
- Implemented features such as user authentication, tweet posting, and a live feed.
- Designed a responsive and intuitive interface for seamless user interaction.

ICE Password Repository – Secure Password Manager | [Github](#) **JUNE 2023**

- Created a secure desktop application for storing and managing passwords using ASP.NET Core and MySQL.
- Implemented AES encryption for enhanced data security.
- Designed a user-friendly interface using Bootstrap for password management and retrieval.

EDUCATION

Bachelor of Science in Computer Engineering

2021 - PRESENT

Angeles University Foundation - College

- **GWA:** 93.4 (Current)
- **Awards:** College Scholar, University Scholar (Current)
- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Software Design, Embedded Systems, Web/Mobile Development, Operating Systems

Science, Technology, Engineering and Mathematics (STEM)

2019 - 2021

Systems Plus College Foundation - Senior High School

- **GWA:** 94
- **Awards:** With Honors, Academic Excellence in Research Project

Information and Communication Technology (ICT)

2015 - 2019

Dona Asuncion Lee Integrated School - Junior High School

- **GWA:** 93
- **Awards:** With Honors, Academic Excellence Award, Best in ICT, Community Service Award

CERTIFICATIONS

Safety and Analytics in the Digital Age: Bridging OSH Standards and Data Science

DEC. 2024

CCNAv7: Introduction to Networks

FEB. 2024

CCNAv7: Switching, Routing, and Wireless Essentials

JAN. 2024

Introduction to Packet Tracer

MAY 2023

Workshop on Machine Learning using ROBOFLOW

MAY 2023

Roles of Electronics Design on Energy Efficiency and Conservation:
Metering Applications and Smart Grid Technologies

DEC. 2023

Recreational Coding: How to get better with Code

MAY 2022

TESDA Visual Graphic Design NCIII

2019-2024

AFFILIATIONS

Institute of Computer Engineers of the Philippines Student Edition

A.Y. 2024 - 2025

AUF Chapter (ICPEP.SE-AUF Chapter)

Vice President - External

College of Engineering and Architecture Athletics and Talents

A.Y. 2023 - 2025

Support Squad (AUF CEAATSS)

Creative Director

Institute of Computer Engineers of the Philippines Student Edition

A.Y. 2023 - 2024

AUF Chapter (ICPEP.SE-AUF Chapter)

Treasurer

BS-CPE Class President

A.Y. 2021 - 2025
